Ramkumar Karuppaiah

Technology Lead · Angular Specialist · Full-Stack (.NET & Node.js)

Tamil Nadu, India (open to remote) · rkram90be@gmail.com · linkedin.com/in/rkram90be · github.com/rkram90 · rkram-portfolio.pages.dev

SUMMARY

Technology Lead with 13+ years in web engineering and 8+ years in Angular, building enterprise front ends for airlines and telecoms. Leads onshore/offshore teams from requirements to release and production support. Experienced in micro-frontends, real-time and event-driven platforms on AWS, and full-stack delivery with .NET and Node.js.

SKILLS

Frontend: Angular (8–19), TypeScript, RxJS, NgRx, Angular Material, AG-Grid, HTML5, CSS3/SASS, JavaScript
Backend: .NET 8 (C#), Node.js (Hapi.js), REST APIs & microservices, GraphQL, Spring Boot, Java, PHP
Cloud & DevOps: AWS (S3, Lambda, EventBridge, SNS, SQS, EC2, IAM), Docker, Jenkins, GitLab CI/CD, Azure DevOps, Git
Architecture: Micro-frontends (Webpack Module Federation), Nx monorepos, SignalR real-time, event-driven workflows
Quality & Observability: Vitest, Jasmine, Cypress, xUnit, SonarQube, Dynatrace, Datadog, Splunk, Kibana, accessibility (WCAG)
Data & Platforms: MySQL, MongoDB, DuckDB, Adobe Experience Manager, Magnolia CMS, Magento, WordPress

EXPERIENCE

Infosys — Technology Lead (2022–now), Technology Analyst (2018–2021)

Feb 2018 – Present · Chennai

Airline Reservations Platform — major US airline · Technology Lead — May 2025 – Present

- Lead an onshore/offshore team building the Angular 19 + .NET 8 front end that replaces a legacy reservation system used by call-center agents.
- Delivered the federal excise tax module end to end for domestic ancillary purchases (unaccompanied-minor fees, mileage purchases, bundles).
- Led the digital menus feature that lets agents personalize meals for upcoming flights.
- Own code reviews and production support, using Dynatrace, Quantum Metric and Kibana for root-cause analysis.

Fare Automation Platform — major US airline · Technology Lead — May 2024 – Apr 2025

- Led delivery of a self-service fare calculation platform built on industry fare standards, replacing manual, slow processes.
- Built a real-time workflow UI with Angular 16, NgRx and AG-Grid, pushing live status to users over SignalR.
- Queried Parquet data directly from S3 with DuckDB; orchestrated processing with EventBridge, Python Lambda, SNS and SQS.
- Raised Angular unit-test coverage to 90%, enforced by SonarQube quality gates; monitored with Datadog and Dynatrace.

Telecom Platform Modernization — European telecom provider · Technology Lead — Jan 2023 – Apr 2024

- Designed a micro-frontend architecture of independently deployable Angular 14 apps with Webpack Module Federation to bring an acquired brand into the central platform.
- Integrated GraphQL APIs, Node.js/Spring Boot services and Magnolia CMS content; led design, reviews, testing and releases.
- Validated accessibility compliance and monitored production with Splunk.

Customer Self-Service Portal — US wireless carrier · Technology Analyst → Lead Mar 2020 – Dec 2022

- Built the customer portal for usage, billing, plan changes, chat and online shopping in Angular (Nx, NgRx) integrated with AEM 6.5 components.
- Built a Hapi.js backend-for-frontend that shapes external REST data for the UI; shipped through GitLab CI/CD and Docker.
- Promoted to Technology Lead in 2022; led the offshore team technically and ran front-end code reviews.

Venue Booking App — US media & cable company · Technology Analyst Nov 2019 – Feb 2020

- Built individual and group booking with calendar time slots, QR-code tickets, My Bookings, multilingual support and consent-management integration.

B2B Account Portal — US wireless carrier · Technology Analyst Feb 2018 – Oct 2019

- Produced high- and low-level designs and prototypes for a business self-service portal (profiles, billing, payments, orders); built accessibility-compliant pages and supported go-live.

Programmer Analyst — Tychons Solution Jan 2016 – Nov 2017 · Chennai

- Turned static designs into dynamic sites with Magento, WordPress and CodeIgniter; tested and deployed to Apache and Nginx.

Software Engineer — IndiaProperty Online Mar 2014 – Dec 2015 · Chennai

- Built core libraries for mailer-template generation and search; made the home module faster and more reliable.

PHP Developer — Spider Infomedia Jan 2013 – Mar 2014 · Chennai

- Developed web applications with CodeIgniter and MySQL.

CERTIFICATIONS

- Adobe Experience Manager: Develop Websites and Components; Extend and Customize AEM
- Web Component Development using Java Technologies
- Claude Certified Architect Foundations (Udemy)
- Infosys Certified Angular Professional · Front End Web Developer · Global Agile Developer

EDUCATION

Bachelor of Engineering, Computer Science and Engineering 2012
